

Help us weed, water, and maintain Stone Canyon Creek!

About

The once mighty Stone Canyon Creek used to be a dominant feature of the UCLA campus. Over the years, as the campus expanded, the creek was routed underground, and today only a small segment runs through the UCLA Lab School campus and behind the Anderson School of Management. The vegetation that persists at the creek site is dominated by invasive plants which are overtaking and pushing the few remaining native plant and wildlife species. *Help us eliminate this infestation of invasive vegetation, replant the area with native vegetation, and restore this all but lost ecosystem.*

Location

On the grounds of the UCLA Lab School and behind the Anderson School of Management. 330 Charles E Young Drive N, Los Angeles 90095

Parking

Parking passes can be picked up in front of the school and we will show you where to park.

Bring

Water, sunscreen, snacks, and wear closed-toed shoes. Gloves and tools will be provided. **NOTE:** Event will be cancelled if it rained or will rain.
