

LAX DUNES PRESERVE

MARCH 2015 VOLUNTEER DAYS

Miracles do happen! We removed invasive acacia from this slope last year. You can still see the leaf litter and seed pods there on the ground. And look what popped up from the acacia litter! Native plants! We weeded invasive plants out of this area and we'll probably remove the leaf litter next year after these plants are more established. L to R (clockwise): Dunes lupine, Beach primrose, and California poppy. We also saw a few new pink sand verbena plants (not pictured here)! Thanks for all your help!

Spring is afoot and so are the invasive plants. Help save the baby native plants!

Thanks for helping to save this great view and natural area!

Meet across from Trask Triangle Park in Playa Del Rey by the gate (across from 267 Waterview Street, Playa Del Rey, CA 90293). Parking is available in the preserve so you can plan to drive in. Please present your completed liability waivers at the entrance. Please bring reusable/refillable water containers, a snack, and wear closed-toe shoes, long pants and sun protection. Please arrive early. Gates close at 9:15am.
