

Ballona Wetlands Community Iceplant Removal Project

Join Us September 8th at 9am or 2pm or
September 13th at 9:30am

We need your help to remove invasive iceplant! There are over 35 acres of iceplant throughout the Ballona Reserve, with 10 acres concentrated south of Culver Boulevard (Area B). Invasive plants steal water from native salt marsh vegetation and alter soil conditions. This community project will remove approximately 3 acres of iceplant south of Culver Blvd. in partnership with the California Department of Fish and Wildlife.

What to bring: water, snack, hat, sunscreen, and closed-toed shoes (mandatory). Gloves and tools will be provided.

Parking: There is no parking around the iceplant removal site. The best option is to park in the California Department of Fish and Wildlife's parking lot behind the market at **303 Culver Blvd**, Playa Del Rey, CA 90293. Google Map: <http://bit.ly/iceplantremoval>.

An **RSVP** is **necessary** as space is limited. Email rabbott@santamonicabay.org

Project site (left) — predominately invasive iceplant

Nearby area without iceplant (right) — mixed native salt marsh plants
