Free Eco-Education Workshops: Dockwalkers Help Boaters Keep Pollution Out of the Ocean

Dockwalker Training Helps Young Adult Volunteers Hone Job Skills

LOS ANGELES (March 4, 2020) Free Dockwalker trainings return this spring to educate volunteers on how to promote environmentally-sound boating practices across the Southern California coast. From March to May, five free workshops will familiarize volunteers with clean boating tips and resources to bring to their local boating communities. These workshops are provided by [The Bay Foundation](#) (TBF), California Coastal Commission, and California State Parks Division of Boating and Waterways' Boating Clean and Green Program.

Dockwalkers make up an incredible statewide force that effectively interact with recreational boaters through face-to-face education. This method of communication and the distribution of educational Boater Kits have proved to be powerful means to keep California's waterways clean. Last year, volunteer Dockwalkers distributed 7,800 Boater Kits and donated more than 1,800 hours to environmental education efforts. Often these efforts are combined with other marine-based or educational programs with partners such as the Local Conservation Corps.

Crews from three local conservation corps – LA Conservation Corps, Conservation Corps of Long Beach, and Orange County Conservation Corps – were trained as Dockwalker volunteers in 2019, to complement their innovative and successful recycling programs. Conservation Corps around the region provide young adults with work experience in a variety of conservation and community service projects. Participation in the Dockwalker program serves the Corps' emphasis on conservation and service projects that benefit the community, including the recreational boating community and marine environment.

"As a Program Coordinator with the LA Conservation Corps, I see firsthand the benefits of Corpsmembers participating in the Dockwalker program," says Carla Alas. "Corpsmembers build confidence and interpersonal skills by interacting with the boating community at outreach events they attend alongside The Bay Foundation."

'Dockwalking' can take place in a variety of places, not just by walking on the docks, and can be curated to each boater's interests. Boat shows and festivals are excellent places for boaters to learn from a Dockwalker's arsenal of topics on boat-based pollutants, including sewage, fuel, marine debris, and more. The flexibility and versatility of the program's eco-solution mission is mirrored in TBF's creative approach to [education](#). TBF and its partners produce the [Pumpout Nav app](#), which geolocates the nearest sewage disposal resources; Southern California tide calendars

www.SantaMonicaBay.org

that highlight various waste disposal resources; and short videos on environmental laws, effects of pollution, and resources to prevent boat-based pollution. All of these tools are utilized by Dockwalkers in their interactions with boaters for a multi-pronged educational experience.

“Dockwalker volunteers are appreciative of the dynamic program and their ability to bring an effective pollution-prevention strategy into their own communities,” states Victoria Gambale, TBF’s Community Engagement Program Manager. “Each year, we hear from long-standing Dockwalkers about how they are glad their feedback is adapted into the program and how TBF and its partners continually work to keep the program fresh, fun, and relevant.”

To become a Dockwalker volunteer, [sign up for a training online](#) or contact Victoria Gambale vgambale@santamonica.org. For more information, visit the [Dockwalker Program webpage](#). Training is free. Registration is required.

Spring 2020 Dockwalker trainings will be held at the following locations and times:

March 28, 2020 – Newport Beach

10 AM – 12:45 PM

Newport Sea Base

1931 West Coast Highway, Newport Beach, CA 92663

April 25, 2020 – San Diego

10 AM – 12:45 PM

Silver Gate Yacht Club

2091 Shelter Island Drive, San Diego, CA 92106

May 8, 2020 – Oxnard

1 PM – 3:45 PM

USCG Recruiting Center, Channel Islands Harbor

4202 S. Victoria Avenue, Oxnard, CA 93035

May 9, 2020 – Marina del Rey

10 AM – 12:45 PM

Santa Monica Windjammers Yacht Club

13589 Mindanao Way, Marina del Rey, CA 90292

May 16, 2020 – San Pedro

10 AM – 12:45 PM

Long Beach Yacht Club

6201 E. Appian Way, Long Beach, CA 90803

About The Bay Foundation (TBF)

The Bay Foundation (TBF) is a 501(c)(3) non-profit environmental group founded in 1990 to restore and enhance the Santa Monica Bay and local coastal waters (from the LA-Ventura county line to the Palos Verdes Peninsula). The Bay Foundation is a partner in the Santa Monica Bay National Estuary Program along with the Santa Monica Bay Restoration Commission and many other organizations. TBF works collaboratively with a broad group of stakeholders, including government agencies, industry, environmental groups, and community members. TBF engages scientists and conducts research while mentoring student interns and volunteers in

conjunction with the Frank R. Seaver College of Science and Engineering through the Coastal Research Institute at Loyola Marymount University. (TBF: www.santamonica-bay.org, CRI: lmu.edu/cri)

About DBW

Boating and Waterways is a division of California State Parks. DBW provides safe and convenient public access to California's waterways and leadership in promoting safe, enjoyable, and environmentally sound recreational boating. (www.dbw.parks.ca.gov)
